Where to Find Us

Kulsen & Hennig - 100% Committed to Colour!

Book Recommendation - A Dictionary of Color Combinations

From Our Collection - A Fair Preview!

---

**Dear Customers, Dear Friends of our Natural Fancy Coloured Diamonds,**

**It's that time again!**

Once more, we are delighted to be present at Inhorgenta in Munich from **February 16 to 19** to share our colourful treasures with you in person!

**We would like to invite you to visit us at our stand (Hall C1/Stand 309)!** As our Natural Coloured Fancy Diamonds are at their most charming when you actually hold them in your hand, be sure to come by and let yourself be enchanted by the many, beautiful colours at play!

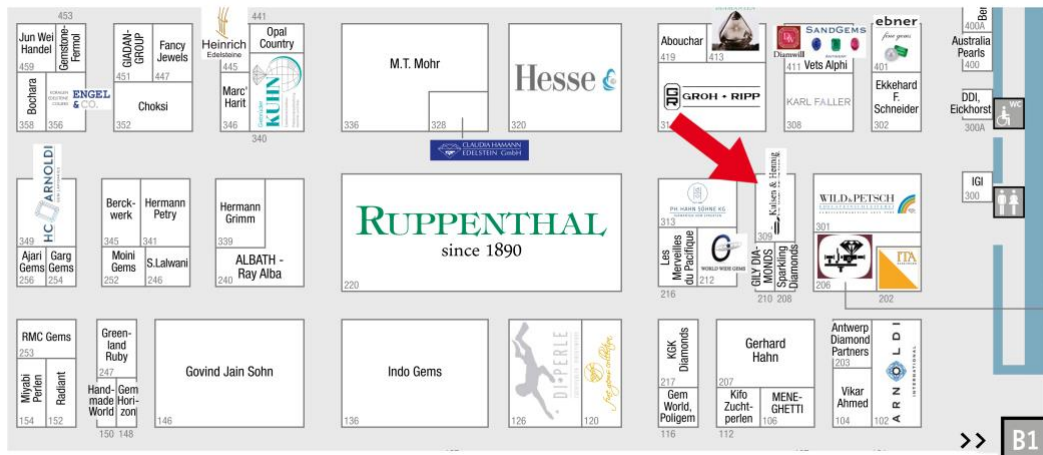

Your teams from Kulsen & Hennig GbR and Dominik Kulsen AG

Juliane Hennig

### **Where to Find Us**

We look forward to your visit once again this year in **Hall C1 at Stand 309!**

You will find all hall and site plans [here](#).

## Kulsen & Hennig - 100% Committed to Colour!

This year, **rich colours** are on the agenda!

From **"Intense"** and **"Deep"**, all the way through to **"Vivid"**, Natural Fancy Coloured Diamonds come in all colour intensities and offer a large selection of vibrant hues. Nature produces diamonds in colours that range from **almost colourless with only a slight coloured shimmer**, to **rich and intense colours** that are impossible to miss.

Because diamonds are the gemstones with the widest colour spectrum, they offer not only **pure colours**, such as Fancy Vivid Yellow or Fancy Intense Pink, but also endless possibilities of **mixed colours**, such as Fancy Deep Orange Yellow, a strong, rich yellow with a warm, orange undertone, or Fancy Intense Purple Pink, a strong pink with a cool, purple shimmer.

Our company's distinguishing feature and overall goal is to find diamonds with the most beautiful colours and colour blends, combined with high-quality cut and purity. This task is sometimes almost like a treasure hunt!

## 100% Quality Guaranteed - Our Strengths:

### 100% Diamond

As the saying goes, not all that glitters is gold. In our case, however, everything that shines and glitters is indeed **100% diamond!** There's really nothing more to say!

### 100% Colour

Natural, genuine, and untreated - these are our treasures. The term "Natural Fancy Colours"

means that no treatments have been used to improve or intensify a diamond's colour. Stones are polished so that the intrinsic colour they were originally found with in nature shines through in all its unaltered splendour. And although colours in nature are hardly ever the same, we are able to provide our customers with rare colour ranges and matching pairs.

*Note: In an effort to meet the high demand for rare colours such as green and blue, we also keep some treated diamonds in stock. These are listed separately and are clearly labelled by us and provided upon request.*

### **100% Advice**

No question is too insignificant for us! Everyone starts small, and we are more than happy to accompany you on your journey into the world of Natural Fancy Coloured Diamonds. In order to provide our customers with the best, most professional support, all our employees receive in-house, personalized, and individual training. We endeavour to answer every single question to the best of our knowledge and ability and to help our customers select the perfect diamonds for their needs. Please feel free to call us at any time or contact us directly at our stand at Inhorgenta. We also welcome new customers and young professionals who are just starting out in the business!

### **100% Service:**

No enquiry is too small or too large. Whether you are interested in a 0.01 ct or 10 ct stone, we are there for you. Every inquiry is important to us, and we process them all with the same motivation in mind - providing all our customers with the best possible quality. We take the greatest care when preparing orders for individual stones, from the smallest to the largest, as well as orders for rows of stones, colour gradients, and pavé goods.

Thanks to our large inventory, we can also handle challenging customer requests quickly and competently. Orders are usually ready to send out on the same day and can be delivered to the customer within 24 hours upon request. We can also arrange to send you diamond selections, so you can take your time in choosing your stones or perhaps show them to your customers for inspection. For exceptional requests, we can rely on our extensive global network of partners to find exactly the right stone.

**Many valuable treasures from our inventory will be on display at Inhorgenta. Natural Fancy Coloured Diamonds should be seen in person before purchasing, so a visit is definitely worthwhile!**

## **Book Recommendation - A Dictionary of Color Combinations**

Sometimes we fall into the habit of always choosing the same colour combinations for a project, be it decorating a home, choosing a new outfit, or even designing jewellery. For the daring and curious, this book offers some new ideas and suggestions for tackling the extremely diverse subject of "**colour**".

The colour inspirations come from Sanzo Wada (1883-1967) who was an artist and a teacher, as well as a costume and kimono designer during a turbulent period in Japanese avant-garde art and cinema. The easy-to-read book is based on his original 6-volume work from the 1930s and contains 348 attractive colour combinations to inspire you.

Wada was ahead of his time in the development of traditional and Western-influenced colour combinations and helped lay the foundations for contemporary colour research.

The many different colour combinations, presented in groups of two, three, or four with wonderful names such as "Pale Burnt Lake" or "Raw Sienna", are entertaining and stimulate the imagination.

The book would be ideal for displaying in a shop, as it is very enjoyable to browse through. Thanks to its handy paperback format with a soft cover, it would also make a great gift for anyone who is interested in colours or curious to learn more about the subject. In short, a picture book that is fun to read.
